2017-2018

CI N-		1.1.5 Average percentage of			nip/ skill development offered by the institution during the last five years (10)		Link t
SI.No.	Programme Code	Programme name	Course name	Course code		Year of Introduction	the
1	CE	CIVIL ENGINEERING	Technical English	115ENT01	Employability - This course will enhance the nuances of language skills where students can identify and rectify their errors in language.	2015-2016	
2	CE	CIVIL ENGINEERING	Engineering Mathematics	115MAT02	Employability-This course will help the students to model the real life problems	2015-2016	
3	CE	CIVIL ENGINEERING	Engineering Graphics	115EGT05	Employability- The fundamentals and application of Engineering Graphics drive the students as an Engineer since drawing is the language of Engineers.	2015-2016	
4	CE	CIVIL ENGINEERING	Professional Communication	215ENT01	Employability - This course will help students develop their communication skills	2015-2016	
		CIVIL ENGINEERING	Internal Calculus and Compley				
5	CE	CIVIL ENGINEERING	Analysis	215MAT02	Employability-This course will help the students to model the real life problems Skill Development- This course will make the students to practice with basic engineering practices like	2015-2016	
6	CE	CIVIL ENGINEERING	Enginering Practice Lab	215EPP06	carpentry, welding foundry, electrical and electronics.	2015-2016	
7	CE	CIVIL ENGINEERING		315MAT01	Employability-This course will help the students to model the real life problems	2016-2017	
8	CE	CIVIL ENGINEERING	C5	315CET03	Employability -gain knowledge on the elementary concepts of Geology in Civil Engineering	2016-2017	
9	CE	CIVIL ENGINEERING	Mechanics of Solids	315CET04	Employability-gain knowledge on stress, strain and material properties used in construction industry	2016-2017	
10	CE	CIVIL ENGINEERING	Mechanics of Fluids	315CET05	Employability-gain knowledge in behaviour and design of hyrdualic structures	2016-2017	1
10	CE	CIVIL ENGINEERING	Surveying - I	315CET06	Entrepreneurship/Skill Develoment - To possess the knowledge on Classification of Surveying. To impart knowledge on applications of levelling in Engineering field.	2016-2017	
10	CE	CIVIL ENGINEERING	Advanced Construction Techniques	315CEE01	Entrepreneurship - gain knowledge in various building materials and construction techniques	2016-2017	
10	CE	CIVIL ENGINEERING	Construction resource Planning & Management	315CEE02	Entrepreneurship - knowledge on Construction planning & scheduling helps in High profile construction companies	2016-2017	
10	CE	CIVIL ENGINEERING	V	315CEE03	Entrepreneurship - gain knowledge in project monitoring and controlling	2016-2017	
10	CE	CIVIL ENGINEERING		315CEE04	Skill development -gain knowledge in testing of various building materials used in construction	2016-2017	
10	CE	CIVIL ENGINEERING		315CEP08	Entrepreneurship/Skill Develoment -gain knowledge in various surveying techniques and equipments whuich enhances employment opportunities	2016-2017	
10	CE	CIVIL ENGINEERING	Strength of Materials Laboratory	315CEP09	Skill Develoment-gain knowledgen in testing materials for strength	2016-2017	
10	CE	CIVIL ENGINEERING	Strength of Materials	415CET02	Employability-This course will help the students to model the real life problems	2016-2017	
10	CE	CIVIL ENGINEERING	Geotechnical Engineering	415CET03	Employability-gain knowledge on deformation and strains under different load action and response in terms of forces and moments	2016-2017	
10	CE	CIVIL ENGINEERING	Transportation Engineering - I	415CET04	Employability-to understand, soil as an engineering material the load- deformation behaviour, through its index and engineering properties	2016-2017	
10	CE	CIVIL ENGINEERING	Applied Hydraulic Engineering	415CET05	Employability-helps in planning and design of highway structures	2016-2017	
10	CE	CIVIL ENGINEERING	Hydrographic Surveying in detail	415CEE01	Employability- Concepts of fluid mechanics and applications to fluid machinery will enable the students to perform better as an engineer during their employability	2016-2017	
10	CE	CIVIL ENGINEERING	Aerial Surveying in detail	415CEE02	Skill Develoment - gain knowledge in various surveying techniques and equipments whuich enhances employment opportunities	2016-2017	
10	CE	CIVIL ENGINEERING	Lidar Surveying	415CEE03	Skill Develoment - gain knowledge in various surveying techniques and equipments whuich enhances employment opportunities	2016-2017	
10	CE	CIVIL ENGINEERING	Surveying - II	415CEE04	Skill Develoment - gain knowledge in various surveying techniques and equipments whuich enhances employment opportunities	2016-2017	
10	CE	CIVIL ENGINEERING	Photogrammetric Surveying & Image processing	415CEE05	Entrepreneurship/Skill Develoment -gain knowledge in various surveying techniques and equipments whuich enhances employment opportunities	2016-2017	
10	CE	CIVIL ENGINEERING	Building Planning and Drawing	415CEP07	Entrepreneurship/Skill Develoment - gain knowledge in various surveying techniques and equipments whuich enhances employment opportunities	2016-2017	
10	CE	CIVIL ENGINEERING	Hydraulic Engineering Laboratory	415CEP08	Skill Develoment- gain knowledge in preparing plan and building drawings	2016-2017	
10	CE	CIVIL ENGINEERING	Surveying Practice - II	415CEP09	Skill Develoment-gain knowledge on various hydraulic engineering problems like open channel flows and hydraulic machines	2016-2017	
10	CE	CIVIL ENGINEERING	Concrete Technology	515CET01	Employability- This course develops skills in concreting technology	2017-2018	
10	CE	CIVIL ENGINEERING	Structural Analysis - I	515CET02	Employability-gain basic knowledge on analysing structures	2017-2018	
10	CE	CIVIL ENGINEERING	Design of RCC Structures	515CET03	Skill Develoment-Design skill of RC memebers helps in design of safe and stable RC structures	2017-2018	
10	CE	CIVIL ENGINEERING	Water Supply Engineering	515CET04	Employability-gain knowledge in water supply system	2017-2018	١

Faculty Fill Engineering (Lie & PG)

Adhiyamaan College of Engineering (Autonomo

Hosur - 635 130

Krishnagiri (Dt.), Tamil Nadu.

10	CE	CIVIL ENGINEERING	Foundation Engineering	515CET05	Employability-suggest and design a suitable foundation for a structure depending on the type of soil. Also understand and analyze different types of earth pressure and perform stability checks for retaining wall	2017-2018
10	CE	CIVIL ENGINEERING	Water Shed Management	515CEE04	Employability - gain knowledge in modern techniques and manage storm water and flood	2017-2018
10	CE	CIVIL ENGINEERING	Geotechnical Engineering Laboratory	515CEP07	Skill Develoment - knowledge on soil tests and investigations helps in civil engineering projects	2017-2018
10	CE	CIVIL ENGINEERING	Public Health Engineering Laboratory	515CEP08	Skill Develoment - gain knowledge on water testing and environmental pollutants	2017-2018
10	CE	CIVIL ENGINEERING	Extensive Survey Camp (Two Weeks)	515CEP09	Entrepreneurship/Skill Develoment-through hands on training and applications on survey methods and equipments helps in employability opportunities as a surveyor	2017-2018
10	CE	CIVIL ENGINEERING	Structural Analysis - II	615CET01	Employability-gain knowledge in analysis of structures to find design forces	2017-2018
10	CE	CIVIL ENGINEERING	Design of Steel Structures	615CET02	Skill Develoment-Design of steel structures as per IS codes is essential for a civil engineer. He can design steel structures such as beams, columns, roof truss, gantry girder, etc.	2017-2018
10	CE	CIVIL ENGINEERING	Sanitary Engineering	615CET03	Employability-gain knowledge to design various unit operations and processes for sewage treatment system and hence can handle waste water disposal issues	2017-2018
10	CE	CIVIL ENGINEERING	Transportation Engineering - II	615CET04	Employability-gain skills to plan and design Railways, Airports and Harbour structures	2017-2018
10	CE	CIVIL ENGINEERING	Irrigation Engineering	615CET05	Employability-design skills for irrigation structures enhance their placement opportunities in the Civil consultancy offices	2017-2018
10	CE	CIVIL ENGINEERING	Advanced Concrete Technology	615CEE01	Entrepreneurship-To know the properties of different materials used for making special concrete	2017-2018
10	CE	CIVIL ENGINEERING	Pre-fabricated Structures	615CEE02	Entrepreneurship-Prefabricated structures is the innovative construction practice and useful for placements	2017-2018
10	CE	CIVIL ENGINEERING	Earthquake Resistant Structures	615CEE03	Employability-knowledge on earthquake resistant structures wil enhance job opportunities in Large scale earthquake resistant projects	2017-2018
10	CE	CIVIL ENGINEERING	Design of PSC Structures	615CEE04	Skill Develoment-Knowledge of prestressed concrete structures helpful in large span bridge and building construction projects	2017-2018
10	CE	CIVIL ENGINEERING	Smart Structures	615CEE05	Employability-Work with various types of Sensors used in smart structures	2017-2018
10	CE	CIVIL ENGINEERING	Concrete and Highway Laboratory	615CEP07	Skill Develoment-Find out the properties of cement, aggregate, bitumen, concrete.	2017-2018
10	CE	CIVIL ENGINEERING	Computer Aided Design - I	615CEP08	Entrepreneurship/Skill Develoment-gain knowledge on software used for drafting and it helps in employment opportunities	2017-2018
10	CE	CIVIL ENGINEERING	Irrigation Drawing	615CEP10	Skill Develoment- Design and draft the various components of the Tank. Design and draft the various irrigation impounding structures.	2017-2018
10	CE	CIVIL ENGINEERING	Environmental Engineering Drawing	615CEP11	Skill Develoment-gain knowledge on water testing and environmental pollutants	2017-2018
10	CE	CIVIL ENGINEERING	Steel Structural Drawing	615CEP12	Entrepreneurship/Skill Develoment -gain knowledge on software used for drafting and it helps in employment opportunities	2017-2018
10	CE	CIVIL ENGINEERING	Bridge Engineering Drawing	615CEP13	Skill Develoment-This course enhances the skill set in design of structural members in particular the desgin of members in a bridge	2017-2018
10	CE	CIVIL ENGINEERING	RCC Structural Drawing	615CEP14	Skill Develoment-gain knowledge on software used for drafting and it helps in employment opportunities	2017-2018
10	CE	CIVIL ENGINEERING	Irrigation Drawing	615CEP10	Entrepreneurship/Skill Develoment-gain knowledge on software used for drafting and it helps in employment opportunities	2017-2018
10	CE	CIVIL ENGINEERING	Environmental Engineering Drawing	615CEP11	Skill Develoment- Design and draft the various components of the Tank. Design and draft the various irrigation impounding structures.	2017-2018
10	CE	CIVIL ENGINEERING	Steel Structural Drawing	615CEP12	Skill Develoment-gain knowledge on water testing and environmental pollutants	2017-2018
10	CE	CIVIL ENGINEERING	Bridge Engineering Drawing	615CEP13	Entrepreneurship/Skill Develoment -gain knowledge on software used for drafting and it helps in employment opportunities	2017-2018
10	CE	CIVIL ENGINEERING	RCC Structural Drawing	615CEP14	Skill Develoment-This course enhances the skill set in design of structural members in particular the design of members in a bridge	2017-2018
10	CE	CIVIL ENGINEERING	Construction Management	711CET01	Skill Develoment-gain knowledge on software used for drafting and it helps in employment opportunities	2014-2015
10	CE	CIVIL ENGINEERING	Estimation and Quantity Surveying	711CET02	Entrepreneurship/Skill Develoment-Knowledge in cost estimation and valuation enhances the job opportunity in the construction field	2014-2015
10	CE	CIVIL ENGINEERING	Remote Sensing & GIS	711CET03	Employability-gain knowledge on different types types of remote sensing platforms and sensors	2014-2015
10	CE	CIVIL ENGINEERING	Concrete Technology & Pre- stressed Concrete	711CET04	Employability- This course develops skills in concreting technology	2014-2015

Chairman, Board of Studies
Faculty of Civil Engineering (UG & PG)
Adhiyamaan College of Engineering (Autonom
Hosur - 635 130
Krishnagiri (Dt.), Tamil Nadu.

10	CE	CIVIL ENGINEERING	Repair and Rehabilitation of Structures	711CEE07	Entrepreneurship-knowledge on repair and rehabilitation of structures will enhance the jobs related to civil consultancy services	2014-2015
10	CE	CIVIL ENGINEERING	Instrumentation for Civil Engineers	711CEE10	Entrepreneurship - gain knowledge about measuring techniques in smart structures.	2014-2015
10	CE	CIVIL ENGINEERING	Computer Aided Design Laboratory – II	711CEP07	employment opportunities	2014-2015
10	CE	CIVIL ENGINEERING	Concrete & Highway Materials Laboratory	711CEP08	Skill Develoment-find the mechanical properties of concrete and assess the quality of bitumen through laboratory tests.	2014-2015
10	CE	CIVIL ENGINEERING	Mini Project	711CEP09	Entrepreneurship/Skill Develoment- Students develop their skills in doing research or desgin and enchance their technical report writing and presentation	2014-2015
10	CE	CIVIL ENGINEERING	Bridge Engineering	811CET01	Skill Develoment-This course enhances the skill set in design of structural members in particular the desgin of members in a bridge	2014-2015
10	CE	CIVIL ENGINEERING	Valuation of Real Properties	811CET02	Entrepreneurship - analyse the valuation of residential, commercial and industrial buildings. Also gain comprehensive knowledge related to the investment of finance in real properties	2014-2015
10	CE	CIVIL ENGINEERING	Reinforced Earth and Earth Retaining Structures	811CEE02	skill development - design skill on masonry and RC structures is an important skill for a civil Engineer	2014-2015
10	CE	CIVIL ENGINEERING	Ground Water Engineering	811CEE05	Employability - Enhance the knowledge on well characteristics and groundwater exploration.	2014-2015
10	CE	CIVIL ENGINEERING	Skill Development Laboratory	811CEP05	Entrepreneurship/ Skill Development - gain field knowledge in vrious Civil Engineering subjects	2014-2015
10	CE	CIVIL ENGINEERING	Project Work	811CEP06	Entrepreneurship/ Skill Development - This course supports the students to undertake recent research works through inhouse project or internship mode to create an employability	2014-2015

Text Books

Modal verbs and probability – concord – phrasal verbs - cause and effect expressions – extended definition —transferofinformation—reading comprehension-contrasting and comparative essays—checklist—creating blogs —e-mail writing Suggested activities: Making sentences using modal verbsto express probability, gap filling using relevant grammatical form of words, identifying the meaning of phrasal verbs, connecting sentences showing cause and effect relationship, flow charts and bar diagrams, reading comprehension, check list, extempore and paragraph writing (analytical and narrative)

UNIT V

9

'if' conditionals—gerunds—idioms and phrases—punctuation-intensive reading—listening-formal letter writing—invitation letter—error correction-writing instructions and recommendations—speaking - short presentations on topics (technical and non-technical) Suggested activities: Sentence completion exercises using 'if' conditionals, correcting sentences (punctuation), essay writing, writing instructions and recommendations, role play, discussion, debating, discussing, etc..

Total Hours 45

Upon Completion of this course, students will be able to:

CO1: Write, test, and debug simple Python programs.

CO2: Implement Python programs with conditionals and loops.

Course Outcomes

CO3: Develop Python programs step-wise by defining functions and calling

them.CO4: Use Python lists, tuples, dictionaries for representing compound

data

CO5: Read and write data from/to files in Python ability to carry out extempore discussions, document and elucidateideas.

Course Outcomes

Upon Completion of this course, students will be able to :

CO1: The student will be able to perform free hand sketching of basic geometrical constructions and multiple views of objects.

CO2: The student will be able to do orthographic projection of lines and plane surfaces. CO3: The student will be able to draw projections of solids, section of solid and development of surfaces.

CO4: The student will be able to prepare isometric and perspective sections of simplesolids.

50 100 215EPP08 **ENGINEERING PRACTICES** LABORATORY Prerequisite At the end of the course, the students should be able to: • To provide exposure to the students with various basic engineering Course practicesinmechanicalengineering **Objectives** • To provide exposure to the students with basic electrical, electronics andcomputerengineeringpractices LIST OF EXPERIMENTS WELDING Study of electric Arc welding and Gas welding tools and equipments. Preparation of Arc welding and Gas welding models: i) Buttjoint ii) Lapjoint iii) T -joint. FITTING: Study of fitting tools and operations. ii) Square fitting Preparation offittingmodels: i) V-fitting SHEET METAL WORK: Study of sheet metal tools and operations Preparation of sheet metalmodels: i) Tray ii)Funnel **PLUMBING WORKS:** Study of pipeline joints and house hold fittings. Preparation of plumbing models: Basic pipe connections with PVC and GI pipefittings. **CARPENTRY:** Study of wooden joints and tools used in roofs, doors, windows, furniture. Preparation of carpentry models:)Lapjoint ii)Dovetailjoint iii) T-Joint **DEMONSTRATION ON: ELECTRICAL ENGINNEERING PRACTICE** Study of Electrical components and equipment's Residential house wiring using switches, fuse, indicator, lamp and energy meter. **ELECTRONICS ENGINNEERING PRACTICE** Study of Electronic components –Resistor, color coding, capacitors etc

COMPUTER HARDWARE AND SOFTWARE PRACTICE

Study of PC Hardware, Internet & World Wide Web and Productivity tools including Word Excel, PowerPoint and Publisher.

Upon Completion of this course, students will be able to :

Course

CO1: Students will be able to prepare the pipe connections and identify the

Outcomes various components used inplumbing.

CO2: An ability to prepare simple wooden joints using wood

workingtools. CO3:

Anability to prepare simple lap, buttand teejoints using arcwelding equipments

CO4: Ability to demonstrate basic electrical electronic and computer components based on their physical parameters and dimensions.

-	SOLIDS							
OBJECTIVES	The subject of Mechanics	of Solid	ls cuts br	oadly ac	cross all br	anches	of er	ngineering
	profession. At the end of the	his cours	e, the stu	dent wil	l have kno	wledge	abou	t behavior
. 6	of members subjected to v	arious ty	pes of fo	rces. The	e subject ca	an be n	naster	ed best by
	solving numerous problem							

Rigid bodies and deformable solids – stability, strength, stiffness – tension, compression and shear stresses – strain, elasticity, Hooke's law, limit of proportionately, modules of elasticity, stress-strain curve, lateral strain – temperature stresses – deformation of simple and compound bars – shear modulus, bulk modulus, relationship between elastic constants – stress at a point – stress on inclined plane – principal stresses and principal planes – Mohr's circle of stresses.

STRESS STRAIN AND DEFORMATION OF TOTAL HOURS

SOLIDS, STATES OF STRESS

UNIT-1

12 HOURS

UNIT-2 TRANSVERSE LOADING ON BEAMS TOTAL HOURS 12 HOURS

Beams – types of supports – simple and fixed, types of load – concentrated, uniformly distributed, varying distributed load, combination of above loading – relationship between bending moment and shear force – bending moment, shear force diagram for simply supported, cantilever and over hanging beams – Theory of simple bending – analysis of stresses – load carrying capacity of beams – proportioning of sections

UNIT-3 **DEFLECTION OF BEAMS AND SHEAR** TOTAL HOURS 12 HOURS STRESSES

Deflection of beams -Macaulay's method – slope and deflection using moment area method, Conjugate Beam method – variation of shear stress – shear stress distribution in rectangular, I sections, solid circular sections, hollow circular sections, angle and channel sections.

UNIT-4 TORSION AND SPRINGS TOTAL HOURS 12 HOURS

Stresses and deformation in circular (solid and hollow shafts) – stepped shafts –leaf springs – stresses in helical springs – deflection of springs.

UNIT-5 THIN CYLINDERS / SHELLS, COMPLEX TOTAL HOURS 12 HOURS

STATE OF STRESS.

Thin cylinders and shells under internal pressure — deformation of thin cylinders and shells, due to Fluid Pressure wire wound cylinders—stress on inclined plane, due to Bi-Axial Loading — principal stresses and principal planes — Mohr's circle of stresses.

TOTAL HOURS TO BE TAUGHT

60 HOURS

COURSE OUTCOMES:

After undergoing the course, the students will have ability to

- CO.1 Find the maximum values of the normal shearing stresses at a given point of a structure subjected to any loading combinations
- CO.2 Determine the max values of the shear & bending moments in a beam & the corresponding shearing & bending stresses. This will provide them with the necessary pre-requisites for the design of beams and shafts for strength and stiffness consideration.

Euler and Bernoulli's equations – Application of Bernoulli's equation – Discharge measurement – Laminar flows through pipes and between plates - Turbulent flow – Hagen Poiseuille equation – Darcy-Weisbach formula – Major and minor losses of flow in pipes – Pipes in series and in parallel

UNIT-5	SIMILITUDE AND MODEL STUDY	TOTAL HOURS	12 HOURS
	Analysis – Rayleigh's method, Buckingham's P nd distorted models.	Pi-theorem – Similitude an	d models –
TOTAL HO	URS TO BE TAUGHT		60 HOURS
COURSE O	UTCOMES:		
After underg	oing the course, the students will have ability	y to	
CO.1	Able to apply the concepts, principles of fluid of fluid flow.	statics and kinematics in r	eal situations
CO.2	Able to apply the hydraulic principles in stead problems.	ly and unsteady flow cond	lition in design
CO.3	Able to understand the pipe network systems.		
CO.4	Able to do the model studies in hydraulic engin	neering projects.

COURSE	E OUTCOMES:	
After und	dergoing the course, the students will have ability to	
CO.1	do geometric design of highways considering the IRC specifications	
CO.2	do structural design of flexible and rigid pavements	
CO.3	plan the road networks	
CO.4	successfully lead and manage highway engineering projects	
CO.5	perform economic analysis for highway management

- 9. Study of impact of jet on flat inclined plate
- 10. Study of major and minor losses in pipes
- 11. Study on performance characteristics of Pelton turbine.
- 12. Study on performance characteristics of Francis turbine
- 13. Study on performance characteristics of Kaplan turbine
- 14. Study on performance characteristics of Centrifugal pumps (Constant speed / variable speed)
- 15. Study on performance characteristics of reciprocating pump.

COURSE OUTCOMES:

- After completing the course, the students will have the ability to
 estimate the velocity and discharge in fluid flow experiments
 determine the minor losses in pipes

 - determine the major losses in pipes
 design the components of the open channel based on velocity and discharge
 draw performance characteristics for turbine and pumps

- 13. Setting out works Foundation marking of a building
- 14. To determine the wave points of the given points/ boundary by GPS survey_
- 15. Demonstration of DGPS- Single and Dual frequency.

COURSE OUTCOMES:

After completing the course, the students will have the ability to

- calculate the height of an inaccessible point by system of tacheometry and to apply field procedures in setting out of a curve.
- calculate the azimuth of a line by observation of sun.
- survey a large area using total station
- identify the type of curve required for the purpose of highways, railways etc., and plotting the same with appropriate accuracy
- operate the DGPS instrument

Water treatment flow-charts. Aeration- Principles of aeration, types of Aerators -Sedimentation-Theory, Types of settling tanks, design. Sedimentation aided with Coagulation, chemical feeding, flash mixing, and clari-flocculator -Filtration-Mechanism - theory of filtration, types of filters, slow sand, rapid sand and pressure filters including construction, operation, cleaning and their design.- Back washing of filters. Operational problems in filters. Disinfection-Theory of disinfection, types of disinfection, Chlorination, chlorine demand, residual chlorine, use of bleaching powder. UV radiation treatment - treatment of swimming pool water - Softening - definition, methods of removal of hardness by lime soda process, zeolite process, RO & Membrane technique. Miscellaneous Treatment - Removal of color, odor & taste, use of copper sulfate, adsorption technique ,fluoridation and defluoridation- Removal of Iron & Manganese.

UNIT-5 DISTRIBUTION SYSTEMS TOTAL HOURS 9 HOURS

System of supply- service reservoirs and their capacity determination- methods of layout of distribution

TOTAL HO	DURS TO BE TAUGHT	45 HOURS
COURSE	OUTCOMES:	
After under	going the course, the students will have al	ility to:
CO.1	Know about water demand, its source &	& collection
CO.2	Understand the Standards applied for d	rinking water.
CO.3	Design the appropriate water treatment	plant for municipal water supply.
CO.4	Understand & design the distribution sy	ystem.

CO.2	Have more knowledge focussed on irrigation and water resources engineering.
CO.3	Apply multidisciplinary approaches to plan, design and execute relevant irrigation and water resources structures
CO4	Design various irrigation structures like canal regulators, cross drainage works, canal headwork's etc.,
CO5	Ability to evaluate Irrigation management system and development of irrigation projects

column. In this, the details of reinforcement at the junction with beams must be shown from the given design data

8. Design and detailing of reinforcement in square, circular and trapezoidal footings

COURSE OUTCOMES:

After undergoing the course, the students will have the ability to

- > Understand the given plan, sectional view of a buildings and implement the same in construction site.
- > Prepare the bar bending schedules for the given building
- > Develop the structural drawing for various RCC elements.
- > Develop the structural drawing for square, trapezoidal and circular footings
- > Prepare the detailed drawing of reinforcement's details for any kind of buildings.

711CET02 ESTIMATION AND QUANTITY SURVEYING

OBJECTIVE 4 1 0 3

This subject covers the various aspects of estimating of quantities of items of works involved in buildings, water supply and sanitary works, road works and irrigation works. This also covers the rate analysis for estimation of various items. At the end of this course the student shall be able to estimate the material quantities, prepare a bill of quantities, make specifications and prepare tender documents.

INTRODUCTION

Estimate, Data, Rates; Type-Preliminary, Approximate, Abstract estimate; Plinth area estimate; Cube rate estimate. Plinth area; Floor area; Circulation area; Carpet area.

2. ESTIMATE OF BUILDINGS

Load bearing and framed structures – Calculation of quantities of brick work, RCC, PCC, Plastering, white washing, colour washing and painting / varnishing for shops, rooms, residential building with flat and pitched roof – Various types of arches – Calculation of brick work and RCC works in arches –

3. ESTIMATE OF OTHER STRUCTURES

Estimating of septic tank, soak pit – sanitary and water supply installations –estimate of earth work of road by three methods from L - Section- estimate of bituminous and cement concrete roads – estimate of retaining walls—estimate of earth work irrigation channels of different cases.

711CET03REMOTE SENSING AND GIS

OBJECTIVE 3 0 0 2

At the end of the course the student will posses knowledge of Remote Sensing Techniques and its application in natural resource management. urban land use planning, site suitability analysis identification of groundwater potential zones, recharge areasCrop inventory mapping forest types and density mapping use of remote sensing data for landslides

1. INTRODUCTION

Definition – Physics of remote sensing – electromagnetic radiation (EMR) = remote sensing windows – interaction of EMR with atmosphere, earth surface, soils, water and vegetation – platform and sensors – image interpretations.

2. LAND USE STUDIES

9

Definition of land use – land use / land cover classification – schemes and levels of classification systems with RS data – land use mapping – change detection – urban land use planning, site suitability analysis, transportation

3. WATER RESOURCES

9

Areal assessment of surface water bodies – Capacity survey of water bodies – mapping of snow-covered areas – flood risk zone mapping – identification of groundwater potential zones, recharge areas – droughts, definition, drought assessment and management,

4. AGRICULTURE, SOIL AND FORESTRY

0

Chairman, Beard of Studies
Faculty of Civil Engineering (UG & PG)
Adhiyamaan Coffege of Engineering (Autonomous)
Hower- 635 130
Karamagiri (Ot.), Tamil Nadu.

Crop inventory mapping – production estimation – command area monitoring – soil mapping – crop stress detection - estimation of soil erosion – forest types and density mapping – forest fire risk zone mapping.

5. EARTH SCIENCE

Lithology – lithological mapping – structural mapping – Geomorphology – nature and type of landforms – identification – use of remote sensing data for landslides – targeting mineral resources – Engineering geology and Environmental geology.

711CEE10 INSTRUMENTATION FOR CIVIL ENGINEERS

OBJECTIVE 4 0 0 3

This course is designed to give an insight into the latest developments regarding smart materials and their use in structures. Further, this also deals with structures which can self adjust their stiffness with load.

1. INTRODUCTION 9

Introduction to Smart Materials and Structures – Instrumented structures functions and response – Sensing systems – Self diagnosis – Signal processing consideration – Actuation systems and effectors.

2. MEASURING TECHNIQUES

9

Strain Measuring Techniques using Electrical strain gauges. Types — Resistance — Capacitance — Inductance — Wheatstone bridges — Pressure transducers — Load cells — Temperature Compensation — Strain Rosettes.

3. SENSORS

Sensing Technology – Types of Sensors – Physical Measurement using Piezo Electric Strain measurement – Inductively Read Transducers – The LVOT – Fiber optic Techniques.

Chemical and Bio-Chemical sensing in structural Assessment – Absorptive chemical sensors – Spectroscopes – Fibre Optic Chemical Sensing Systems and Distributed measurement.

Chairman, board of Studies

PREFABRICATED STRUCTURES

4 0 0 3 **OBJECTIVE**

At the end of this course the student shall be able to appreciate modular construction, industrialised construction and shall be able to design some of the prefabricated elements and also have the knowledge of the construction methods using these elements.

INTRODUCTION

Need for prefabrication - Principles - Materials - Modular coordination - Standarization - Systems - Production -Transportation - Erection

PREFABRICATED COMPONENTS

Behaviour of structural components – Large panel constructions – Construction of roof and floor slabs – Wall panels - Columns - Shear walls

DESIGN PRINCIPLES

Disuniting of structures- Design of cross section based on efficiency of material used - Problems in design because of joint flexibility - Allowance for joint deformation.

JOINT IN STRUCTURAL MEMBERS

9

Joints for different structural connections - Dimensions and detailing - Design of expansion joints

DESIGN FOR ABNORMAL LOADS

Progressive collapse – Code provisions – Equivalent design loads for considering abnormal effects such as earthquakes, cyclones, etc., - Importance of avoidance of progressive collapse.

711CEP07Computer aided design laboratory – II

OBJECTIVE 0 0 4 2

At the end of the course the student acquires hands on experience in design and preparation of structural drawings for concrete / steel structures normally encountered in Civil Engineering practice.

- Design and drawing of RCC cantilever and counterfort type retaining walls with reinforcement details
- 2. Design of solid slab and RCC Tee beam bridges for IRC loading and reinforcement details
- 3. Design of pressed, rectangular and hemispherical bottomed steel tank Staging Detailed drawings
- 4. Design and drafting of intz type water tank, Detailing of circular and rectangular water tanks
- Design of plate girder bridge Twin Girder deck type railway bridge Truss Girder bridges Detailed
 Drawings including connections

811CET01 BRIDGE ENGINEERING

OBJECTIVE 4 0 0 3

At the end of this course the student shall be able to choose appropriate bridge structure and design it for given site conditions. Steel bridge, reinforced concrete slab bridges reinforced concrete girder bridges prestressed concrete bridges.

Chairman, Board of Studies
Faculty of Civil Engineering (UG & PG)
Adhtyaman College of Engineering (Autonomous
Hosur - 635 130
El Stragiri (Dt.), Tamil Nadu.

1. INTRODUCTION

9

Design of through type steel highway bridges for IRC loading - Design of stringers, cross girders and main girders - Design of deck type steel highway bridges for IRC loading - Design of main girders

2. STEEL BRIDGES

9

Design of pratt type truss girder highway bridges - Design of top chord, bottom chord, web members - Effect of repeated loading - Design of plate girder railway bridges for railway loading - Wind effects - Design of web and flange plates - Vertical and horizontal stiffeners.

3. REINFORCED CONCRETE SLAB BRIDGES

9

Design of solid slab bridges for IRC loading - Design of kerb - Design of tee beam bridges - Design of panel and cantilever for IRC loading

4. REINFORCED CONCRETE GIRDER BRIDGES

9

Design of tee beam - Courbon's theory - Pigeaud's curves - Design of balanced cantilever bridges - Deck slab - Main girder - Design of cantilever - Design of articulation.

5. PRESTRESSED CONCRETE BRIDGES

O

Design of prestressed concrete bridges - Preliminary dimensions - Flexural and torsional parameters - Courbon's theory - Distribution coefficient by exact analysis - Design of girder section - Maximum and minimum prestressing forces - Eccentricity - Live load and dead load shear forces - cable zone in girder - Check for stresses at various sections - Check for diagonal tension - Diaphragms - End block - Short term and long term deflections:

0 0 3 2

Chairman, Board of Studies
Faculty of Civil Engineering (UG & PG)
Litiyamaan College of Engineering (Autonomous)
Hosur - 635 130

Kishnagiri (Dt.), Tamil Nadu.

The experimental work involved in this laboratory should make the student understand the Field oriented knowledge in various Civil Engineering subjects.

List of Experiments:

- 7. Measurement of Sound Level
- 8. Standard Penetration Test
- 9. Cyclic Loading Test on RC Frame

10. Study of Performance Characteristics of Impulse Turbine

- 11. Study of Performance Characteristics of Reaction Turbine
- 12. Preparation of Map by using Total Station and GPS

811CEP05 PROJECT WORK

OBJECTIVES

To develop the ability to solve a specific problem right from its identification and literature review till the successful solution of the same. To train the students in preparing project reports and to face reviews and viva voceexamination.

STRATEGY:

The student works on a topic approved by the head of the department under the guidance of a faculty member and prepares a comprehensive project report after completing the work to the satisfaction. The student will be evaluated based on the report and the viva voce examination by a team of examiners including one external examiner.

COURSE OUTCOMES:

After undergoing the course, the students will have ability to

On Completion of the project work students will be in a position to take up any challenging practical problems and find solution by formulating propermethodology.
