#### **Teaching Learning Process**

#### 1. Case study

- The students are taken for Case study of the similar genre before designing any building that helps them to understand the scope of the project better.
- An in-depth analysis of various factors like planning aspects, space and function analysis, material study, structural analysis etc. is done by the students which help them to visualize their design better.
- Based on their case study analysis, the students arrive at positives and negatives of the project which helps them in implementing their findings in their individual design.

#### 2. Site study

- A live site study is proposed for the respective project before starting any design and the students are taken to the site for a detailed analysis.
- The students carry out their analysis on the site which includes Site Location, Neighborhood context, Infrastructure, Social and political boundaries, on-site and off-site features, circulation, utilities, climate etc for better design output.

#### 3. Model Making

• The students are exclusively trained in model making using different materials through studios and hands-on workshops conducted in the department.

#### 4. Rural study

- As part of the academic curriculum, the second year does a comprehensive study of a rural settlement to create a holistic understanding of the socio cultural, geographic, and economic aspects that shape the built environment.
- Students get exposure to the methodology of conducting various surveys covering physical, visual characteristics and socio economic aspects. Through this study students are able to understand the vernacular and traditional architecture involving local building materials and construction techniques.

#### 5. Urban study

- As part of 9<sup>th</sup> semester, the students conduct a series of surveys and analysis to understand the various elements and components of an urban area.
- This includes studying the history of city, morphology from an architectural point of view, to the impact of urban design on community development efforts
- Based on their analysis and findings, the students propose a design solution.

#### 6. Internship

- The students go through a 6 months Internship programme in their 8th semester as part of the curriculum.
- Internship helps the students to gain practical exposure and knowledge of the field.

#### Curricula and syllabus for the Programme as approved by the University
